Please explain in detail on what EACH speaker did well and on what they can improve.

1A Johnathan - great time allocation in the 1AR. I like that you got through (T) as quick as you did so you could spend more time on the (CP). On the DA, try going for more of your offense args (LL) instead of spending so much effort on the NU.

1NR - Good job extending you CP solvency, but make sure you are responding to 2AC args. The Net Benfit could use a little more impact analysis to set it apart from the plan impacts.

2AC - Diversity of arguments on the DA was great, but try ~~to~~ get that level of diversity on your counterplan answers.

2AR - How you relate everything back to case and impact analysis was good. Same comment to you as the 1AR, try to go for more offense on the DA.

2NC - Don't take so much in the 2NC - split the block. Your DA extension was excellant but if you had more time you could have done impact analysis.

2NR - Good job closing 2AR doors. Good explanation of offense and answering aff answers.

*** **Please Do Not Disclose Your Decision** ***

REASON FOR DECISION **(Please write 2-3 sentences about the SPECIFIC arguments you were persuaded by):**

I vote that the Chinese Encirclement DA outweighs the aff harms. The neg wins that the risk of causing a pan-Pacific war would be worse than jeopardizing trade relations with China. While the Economy Impact is important, the Aff did not do enough impact analysis and there was little offense on the DA.
